

## Leadership Starts Here...

 **Cardiovascular Center**

 **Cardiovascular Center**

For over three decades The University of Iowa Cardiovascular Research Center has trained basic and clinician scientists who have become academic leaders throughout the nation and world. Lead by founder and internationally acclaimed center director Francois M. Abboud, MD, the Iowa Cardiovascular Center was the first major interdepartmental and intercollegiate research program at Iowa.

**If you intend to become a leader in academic medicine or biological research, consider the advantages of the University of Iowa Cardiovascular Center Training Program:**

■ **30 years of growth in private and public funding**

■ **A wide range of research opportunities...**

...within a collaborative, multidisciplinary environment that includes active basic, clinical, and translational research participation across 18 departments and colleges\*;

...under the guidance of world class basic and clinical faculty with programs in vascular biology, heart failure, arrhythmias, molecular genetics, cystic fibrosis, acute lung injury, hypertension, and gene therapy;

...in a Center that boasts state-of-the-art core facilities in gene transfer, transgenic modeling, and imaging

■ **Located in a safe, creative, and diverse community that values education at all levels and nurtures leaders in all fields**

\* **Departments** of Anatomy & Cell Biology, Anesthesia, Biochemistry, Biological Sciences, Family Medicine, Internal Medicine, Microbiology, Neurology, Obstetrics & Gynecology, Pathology, Pediatrics, Pharmacology, Physiology & Biophysics, Psychology, Radiology, and Surgery. **Colleges** of Medicine, Liberal Arts, Engineering, and Public Health.

**Start your leadership career here.** Please send your CV, contact information and a brief cover letter to Mark E. Anderson, MD, PhD, Associate Director of the University of Iowa Cardiovascular Center.

**Discover the Iowa advantage.**
