

2018 MEDICATION THERAPY MANAGEMENT (MTM) PILOT PROGRAM SUMMARY

The ABC held 4 regional pilot programs in October 2018. Presentations and dialogue were focused on MTM, minority patients, and increasing communications between providers. More than 50 diverse healthcare stakeholders attended the programs.

MEETINGS REACHED COMMUNITY LEADERS AND ADVOCATES:

PROGRAM OUTCOMES

Attendees were surveyed following the program. A sample responded and provided the following perspectives and Likert scale ratings.

- 9 out of 10 of respondents said the program information shared can be used in discussions with patients and healthcare professionals in their community
- 8 out of 10 respondents report high levels of interest in the materials and concepts discussed
- 9 out of 10 respondents found the group discussions to be relevant to their profession

NEAR-TERM PROGRAMMING NEEDS

As part of the dialogue during the program, participants identified the need for the following:

- Handout cards for physicians, highlighting key information to drive patients to sign up for MTM services
- Patient education resources and programs
- Additional ABC activities focused on pharmacy efforts

"Improved ease of communication between the disciplines can lead to impactful creativity in providing care to their unique communities." - Meeting attendee

PROGRAM AGENDA HIGHLIGHTS

- Overview of MTM services and eligibility
- Review of impact of MTM for underserved patient populations
- Tips for how to speak to patients about MTM
- Background on specific roles in MTM for physicians, pharmacists and others
- Opportunities to expand roles in MTM
